GOD SEES

One day an astronomer sat before his giant telescope making some observations on the sun. As it descended toward the horizon there came into the telescopes view the top of a hill about seven miles away. On the hill was an orchard. In an apple tree...two boys were stealing apples. One was stealing the fruit...the other keeping watch. But there sat the professor, seven miles away, seeing every movement of the boys!

Can any man doubt that God sees his actions...and reactions to all he faces in life?

Please pray for:

- Unsaved/uncertain family members.
- Our shut-ins, Chris Krahn, Asta Kalika & Bill Lennox
